What's next:
Debug this container error with Gordon → `docker ai "help me fix this container error"`
docker: Error response from daemon: Conflict. The container name `"/docker-website-container"` is already in use by container `"c5c93b9c993195f5e3e74020d96a2a3eb4d3a3a18992e804e2ca08f1ce51c4a1"`. You have to remove (or rename) that container to be able to reuse that name.

Run `'docker run --help'` for more information
